## ABOUT US

Established in the year 2013, **Haarzeel Engineers Private Limited** has emerged as a leading Manufacturer and Exporter of a wide range of machinery including **Filling Machines, Mineral Water Plants, Labeling Machines, Capping Machines, Reverse Osmosis Plants, Mineral Water Bottling Plants, Shrink Wrapping Machines, and Turnkey Mineral Water Projects.**

With over **16 years** of industry experience, we have evolved into a stronger and more versatile organization with a broader market reach and a skilled workforce to meet our customers' changing needs.

Dedicated to water purification and environmental sustainability, we combine innovative technologies with cost-effective solutions. With hundreds of successful projects across Power, Chemical, Pharmaceutical, Biotech, and Bottled Water sectors, we deliver reliable and efficient water treatment systems worldwide.

Backed by strong engineering, manufacturing, and project management capabilities under one roof, Haarzeel Engineers continues to innovate and adapt to the latest technologies — ensuring excellence, transparency, and lasting relationships with our clients.

*Engineering Purity, Delivering Excellence*

## OUR PRODUCTS

### RO PLANTS

Our Reverse Osmosis (RO) Plants are designed to treat all types of water sources from borewell to brackish ensuring the highest level of purification. Each system is custom-built to match feed water quality, delivering consistent and safe output.

We use premium-grade components to ensure durability, high performance, and compact design for efficient space utilization. Our RO systems can purify water with up to 50,000 ppm TDS, serving diverse applications such as industrial, drinking, and dialysis water.

- Industrial RO Plant
- Seawater Desalination Plant
- Containerized RO Plant
- SS RO Plant
- Dialysis RO Plant
- Ultra Filtration Plant
- Sewage Treatment Plant
- Water Softening Plant
- Filtration System

## Batch Coding Machine

Haarzeel Engineers Private Limited is a trusted manufacturer, exporter, and supplier of advanced batch coding and printing machines, delivering dependable solutions for coding, marking, and labeling applications.

Our automated batch coding systems provide clear, accurate, and consistent printing on a variety of packaging materials such as pouches, wrappers, foils, PET & glass bottles, plastic, and metal containers ensuring reliable performance across industries.

## Automatic Sticker Labelling Machine

Haarzeel Engineers Private Limited offers Automatic Labelling Machines with advanced hot melt labeling systems, available in multiple operating models. Designed for automatic operation, these machines handle bottles of various sizes and production speeds with ease.

Built from high-grade stainless steel, they ensure durability, precision, and reliable performance. Ideal for labeling bottles, jars, vials, and tins, these machines feature microprocessor-controlled label dispensing and advanced sensing technology ensuring accurate, efficient, and consistent labeling every time.

## Automatic Shrink Wrapping

Haarzeel Engineers Private Limited manufactures Automatic Shrink Wrapping & Packaging Machines designed to handle containers of various sizes, offering a versatile and reliable packaging solution. Equipped with PLC control, the machine ensures precise and consistent shrink results. Its modular conveyor system automatically arranges bottles in the desired matrix form, while advanced sensors and adjustable sealing heads enhance accuracy and operator safety.

## PET Stretch Blow Moulding Machine

Haarzeel Engineers Private Limited offers advanced PET Stretch Blow Moulding Machines designed for the efficient production of PET bottles and containers in various shapes and sizes. Built with precision engineering and durable components, these machines ensure high output, consistent quality, and low maintenance. Equipped with PLC-based controls and user-friendly interfaces, they deliver accurate performance, energy efficiency, and smooth operation for industries like beverages, packaged water, and edible oil.
